

YELLOW PEACHES – FREESTONE VARIETIES

FREESTONE peaches are those that you can twist easily off the pit – the flesh comes easily off the stone.

Freestone peaches require more time on the tree to ripen and will come after the cling/semi-cling varieties. In our area and at our orchard, the freestone season begins about July 10 and continues through the rest of the season, ending about Labor Day.

FREESTONE VARIETIES AND APPROXIMATE RIPENING DATES:
